

About Us

eBizServ started as a business concept with two major goals:

- Deliver the best technology solutions to small and mid size businesses enabling them to "level the technological playing field" and efficiently compete with larger companies.

- Deliver these solutions using industry standards for "Best Practices" and a passionate commitment to customer service and satisfaction.

Bill Graham, the founder of eBizServ, has over twenty years in the IT business working for business and non-profit organizations. He started by working through the ranks of a computer retailer. Over time, Bill has managed increasingly larger IT operations. Before starting eBizServ, Bill worked for national non-profit organizations in Washington, DC. He has been developing web sites and intranets for several years as well as designing and either writing or project managing large-scale database and web-based applications.

Bill brings a track record of consistently delivering IT services to eBizServ. His dedication to customer service and best practices continues in his own company. We understand the satisfaction of our clients along with delivering quality products is critical to the success of the business.

Please consider us for your project. We would appreciate the opportunity to discuss your ideas and goals and provide you with the means to make them happen.
